

**ROSEWOOD  
LIVING WALLS**

*Add A New Dimension  
To Your Space*

*Rosewood Living Walls is a family-run business based in St Albans. We design and install completely bespoke, fully irrigated living walls.*

Plants make everything better. We all need them for health, wellbeing, happiness and balance, but as our gardens get smaller, how can we make our spaces greener?

A living wall can instantly transform a seemingly cramped, dull space into a vibrant, colourful oasis.

Whether you're looking for bee-friendly flowers, a vertical herb garden or year-round colour, we help you to choose planting that reflects your lifestyle and your personality.

But creating an eco-friendly haven of greenery won't mean spending your weekends tending to (or talking to) your plants. Our automatic watering systems give our customers complete freedom to have a high-impact living wall with virtually no maintenance.

When you grow up instead of out, every space, no matter how small, can be a sanctuary from stress. A place to relax, recharge, entertain and enjoy. Add a new dimension to your space with a Rosewood Living Wall.

*"I am delighted with my new living wall which has totally transformed my small garden space."*

*"The view from our patio doors used to be the back of a fence, now it's this amazing wall of plants. We live in a new-build style house and our garden had next to no personality before. The living wall gives the garden such a different vibe and has turned it into a really lovely space ready for summer"*

WHY INSTALL A ROSEWOOD  
LIVING WALL?

## Instant Impact. Zero Maintenance.

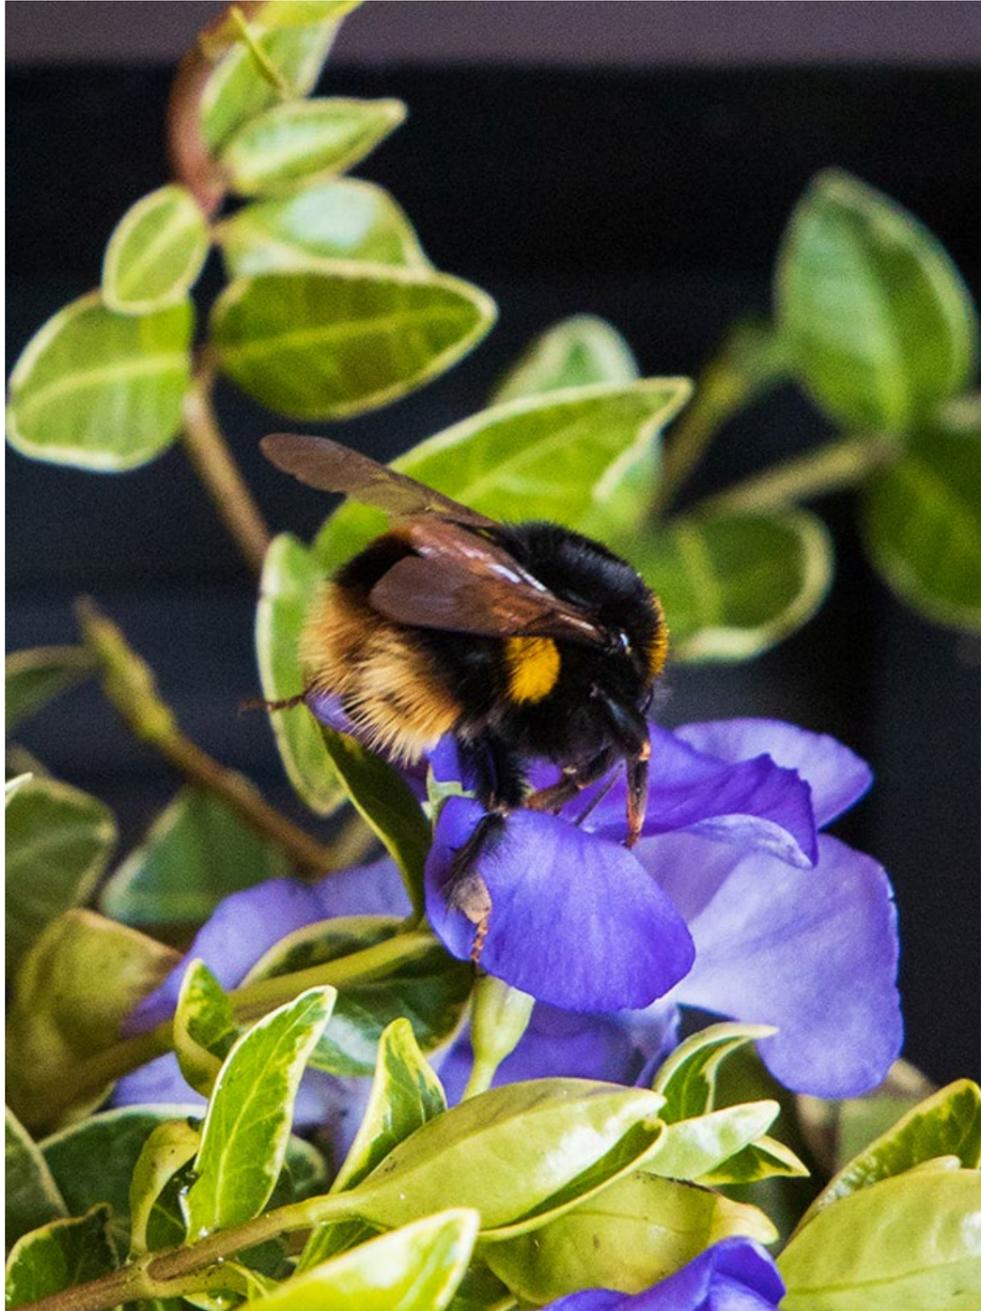

It's been said that tending plants takes patience and while that may have its merits, with a Rosewood Living Wall you don't have to play the waiting game. In less than a day we can install this striking feature, totally transforming your garden or room – no patience required. And you won't have to worry about maintenance. All of our living walls come fully irrigated, even the interior ones. You can be sure your plants will be getting exactly the right amount of water so your living wall keeps getting better for years to come.

## When You Can't Grow Out, Grow Up.

If sprawling lawns and lush flower beds are not a reality for you, do not despair. By using the vertical space to your advantage, even the most minuscule garden can be filled with life and colour – without taking up valuable square footage on the ground. Even if you don't have a garden you can bring the outside in with an interior living wall.

Balcony, city garden, roof terrace or courtyard: with a Rosewood Living Wall, any patch of land can become a space to be proud of.

## Good For You And For The Planet.

The benefits of a living wall go far beyond making your home or place of work instagrammable. Many studies have found that introducing plants into our surroundings boosts wellbeing by reducing anxiety, tension and fatigue.

The injection of greenery that living walls bring will help make your space an oasis of calm. Plants really do make everything better.

### **Cleans Air.**

The injection of plants a living wall brings can help to improve air quality. They remove carbon dioxide and add oxygen through the natural process of photosynthesis, as well as trap dust particles and harmful pollutants.

### **Improves Insulation.**

Exterior living walls provide great insulation, helping to create more energy efficient buildings.

### **Deadens Noise.**

Living walls can absorb acoustic energy, helping to deaden disturbing ambient noise common to open plan offices and urban living (we're looking at you, road noise!)

### **Supports Wildlife.**

We can select a planting scheme that will provide forage for insect pollinators and birds to help tackle declining numbers.

### **Conserves Water.**

Our irrigation systems use only the amount of water needed and can even still be used in a hosepipe ban.

### **Uses Sustainable Materials.**

The structure we use is long-lasting and made from 100% recycled materials.

# Bring The Outside In.

Living walls aren't just for the outdoors. The injection of greenery an interior living wall brings can lift even the duller of spaces.

With a Rosewood interior living wall you can blur the lines between indoor and outdoor, or take your houseplant obsession to the next level with a tropical feature wall.

We can select indoor plants that not only bring life to your space but also help clean the air of pollutants and dust particles. Our irrigation and filtration system will keep your living wall clean and hassle free.

*“From our initial enquiry through to the installation, the experience was a real joy. Knowledgeable and always quick to get back to us, they made the process easy for us. On the day of installation, Calum and Chris did an amazing job. Beautiful design and very little disruption and mess. We are extremely happy with Rosewood and wouldn't hesitate to recommend them.”*

OUR SERVICES

## Residential Living Walls.

Your home is your haven, so when you work with Rosewood, we will first find out what's most important to you and tailor your living wall to suit your taste and lifestyle.

We will guide you through the seemingly endless possibilities of planting schemes and produce a design that is uniquely beautiful and personalised to you. It could be a vertical kitchen garden for growing herbs; low-maintenance planting for year-round colour and structure; bee-friendly flowers that will make your garden a haven for wildlife; or an interior wall to bring the outside in.

## A Wall For Every Home.

Our living walls are made using an incredibly flexible modular system that can fit in the smallest of spaces or cover large expanses.

It can be fixed to almost any surface, adding privacy, disguising eyesores and increasing colour and greenery.

Whatever size space you have, Rosewood Living Walls can work with you to find a custom solution.

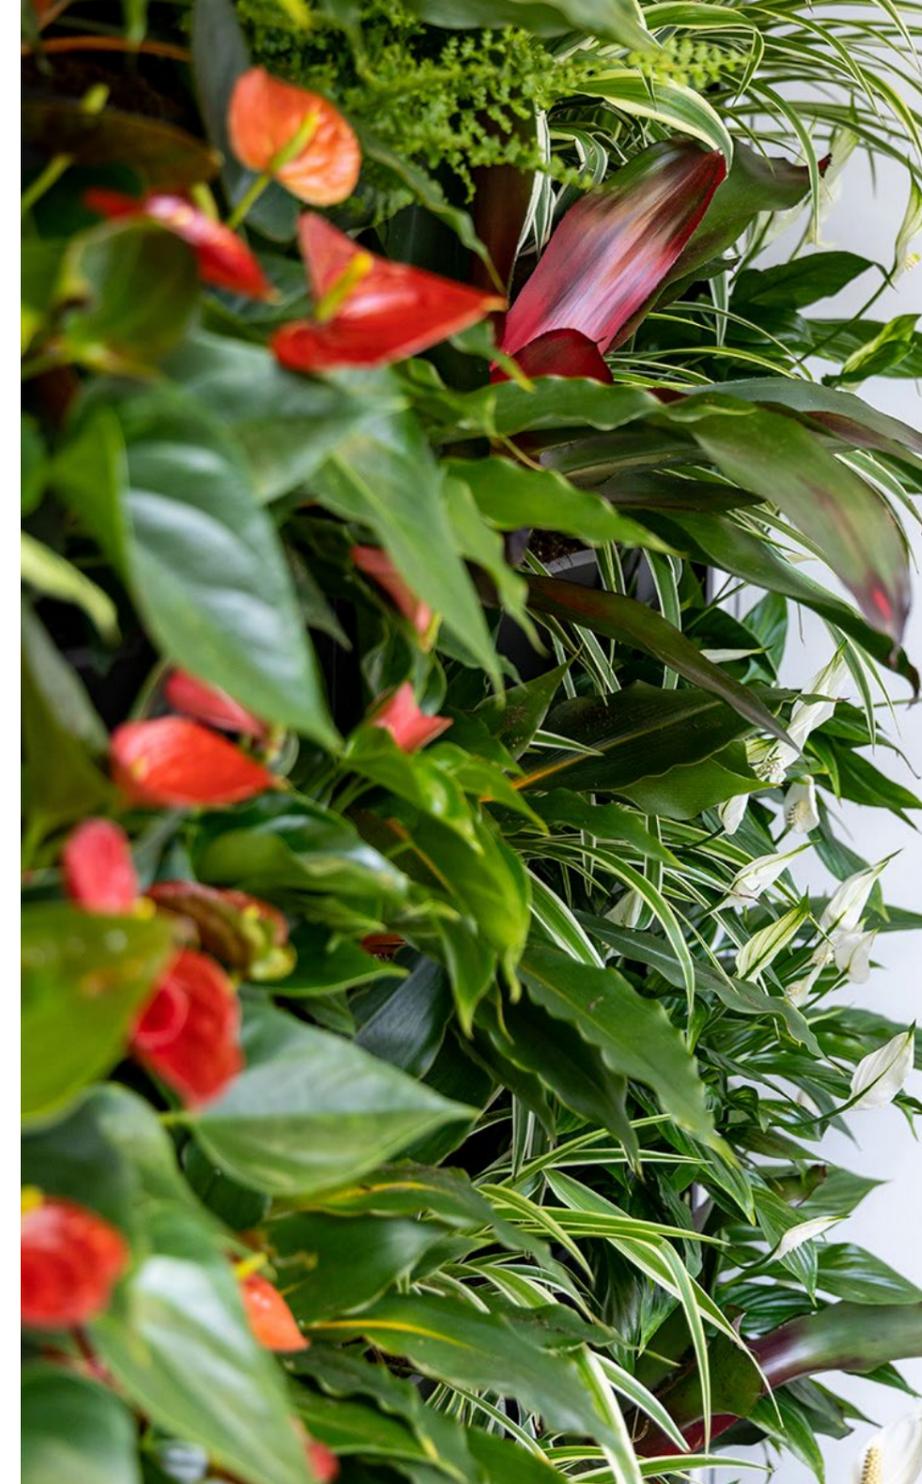

# Commercial Living Walls.

We also work with organisations to design and install living walls for commercial and public spaces including offices, exhibitions, pop-ups, hotels, restaurants and educational institutions.

A living wall can create a welcoming and hospitable environment for employees and customers, build brand awareness and help make your building more sustainable.

We will work with you to create a wall that meets your unique goals.

## **Offices and Workspaces.**

More and more emphasis has been put on the importance of a healthy working environment to increase both mental wellbeing and productivity of employees. Studies have shown that adding greenery boosts productivity by 15% and helps to address symptoms caused by sick building syndrome. An interior living wall could set your workspace apart, making it a place where employees look forward to working.

## **Schools and Colleges.**

These same benefits can also help to create a happy, healthy and productive learning environment. Living walls can also be an excellent educational resource to teach children about growing plants including fruits, vegetables and herbs.

## **Exhibitions and Pop-Ups.**

Stand out for all the right reasons and draw more customers to your exhibition booth or pop-up with a living wall. We can incorporate branded signage or create a stunning backdrop to your photo-op.

## **Hotels, Restaurants and Cafes.**

A living wall can create a visual statement and a relaxing environment for your customers.

## CASE STUDY 1

# A Miniature Wildlife Haven.

The owner of this garden wanted to make the most of her small terrace. An unused area underneath the kitchen window now packs a punch, full of life and vibrant colour. The brief was to make the garden more wildlife friendly as well as to grow a variety of herbs. We planted thyme, rosemary and mint as well as erysimum, primulas and periwinkles, all with purple and pink blooms that especially attract bees and other pollinators.

This really demonstrates the versatility of even smaller living walls, contributing to habitat for local wildlife as well as being a beautiful feature for the owner to enjoy.

*Guide Price: £1,500 - £2,000 + VAT*

## CASE STUDY 2

# A New-Build Garden.

The owners used to refer to their garden as “a little grey square”. They were struggling to find the balance between injecting personality whilst also keeping it low-maintenance. We installed a large living wall that spans the entire back fence of their garden, completely changing the feel of the space.

We filled the wall with low-maintenance planting including ferns, ivy and heuchera, that would provide year round colour and interest. We also fully irrigated the wall so the owners wouldn't have to worry about when and how much to water their new plants.

*Guide Price: £2,500 - £3,500 + VAT*

### CASE STUDY 3

## A Farmhouse Garden.

We installed this living wall at a farmhouse garden located in Hertfordshire. The plants help to soften the aged brick, creating a relaxed seating area.

The planting, which was made up of variegated grasses, heuchera wild rose and heuchera winter joy, brings an array of textures and year round colour - providing an ideal corner for sipping a glass of chilled rosé whilst enjoying the beautiful countryside sunset.

This is a great example to show that living walls can complement traditional settings as well as modern gardens.

*Guide Price: £1,800 - £2,500 + VAT*

### CASE STUDY 4

## A City Sanctuary.

The owners of this Maida Vale property were looking for a solution to cover an expanse of blank wall. With the installation of two large-scale living walls we were able to transform their view from boring white to beautiful green.

Not only does this upgrade their outlook, but also provides a peaceful sanctuary away from the hustle and bustle of city life, trapping pollution and deadening road noise.

*Guide Price: £15,000 - £16,000 + VAT*

## CASE STUDY 5

# A Pop-Up Gin Garden.

Hendricks, the UK's No. 1 premium gin brand, are refreshing the cricket experience with a pop-up gin garden at Lord's Cricket Ground.

We helped them to make their gin garden unforgettable, with a Hendrick's branded living wall bursting with botanicals.

We featured red and maroon planting to celebrate their new Red gin. Now cricket fans can enjoy a "GIN-terval", with ice-cold G&Ts surrounded by a floral oasis.

Guide Price: £7,500 - £7,800 + VAT

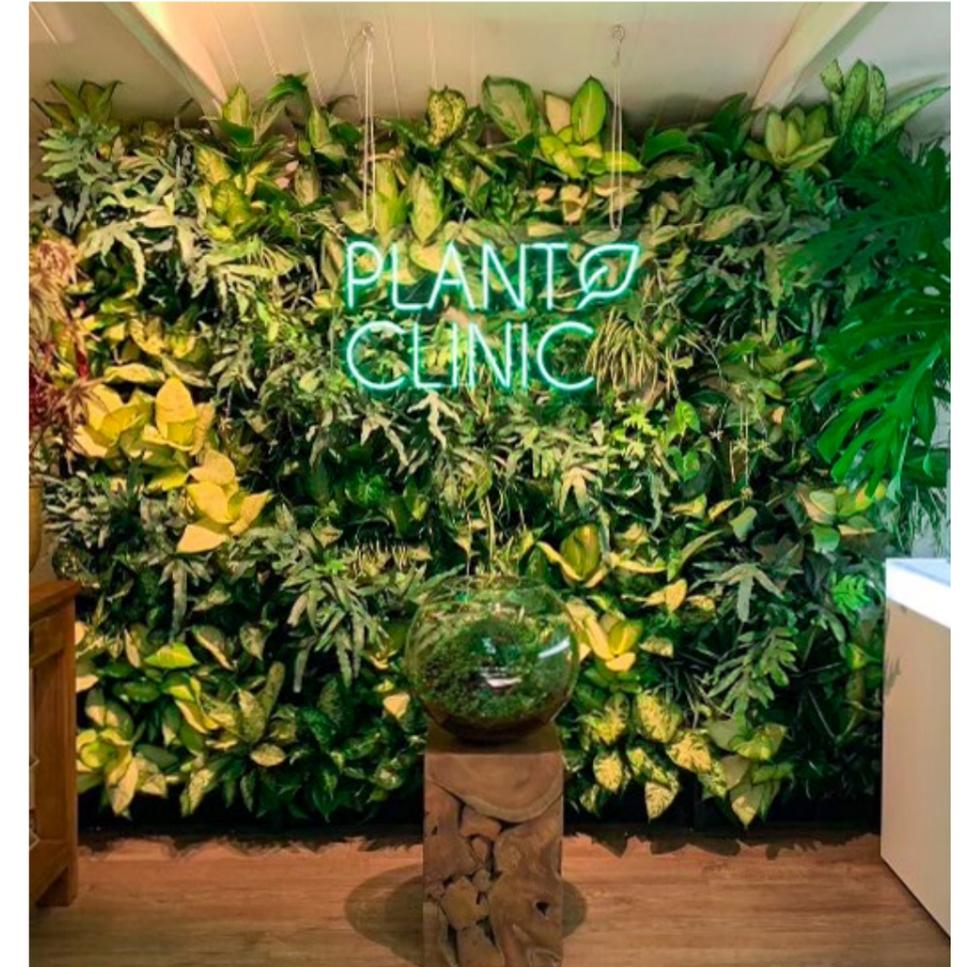

## CASE STUDY 6

# A Living Exhibition Booth.

A living wall is the perfect way to create a stand-out display at any event or show. For their Chelsea Flower Show exhibit, we helped Happy Houseplants install two living walls at their 'Plant Clinic', designed to educate people on how to care for their plants, and how to rescue them if the worst should happen.

They are on a mission to bring the joy of houseplants to everyone's life and this rainforest inspired display reflects their passion for plants.

We installed the system, and Happy Houseplants got creative, decking them out with their own planting scheme.

Guide Price: £3,000 - £3,500 + VAT

## CASE STUDY 7

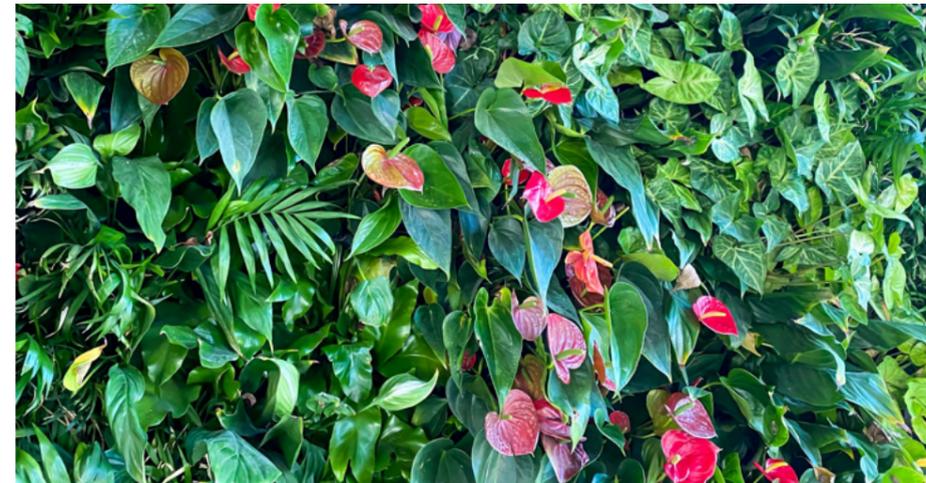

# A Striking Office Entryway.

The architect of this brand new office space wanted to collaborate with a local company to add a striking finishing touch to the entryway.

This floor-to-ceiling interior living wall certainly sets this office apart, providing a beautiful environment for both staff and clients.

The large windows let in natural light all day, so the planting needed to be able to withstand direct sunlight. As a busy place of work, the planting also needed to stay lush and healthy with very little upkeep. The irrigation system means that it is both safe and low-maintenance, ensuring the wall will continue thriving for years to come.

*Guide Price: £11,000 - £12,000 + VAT*

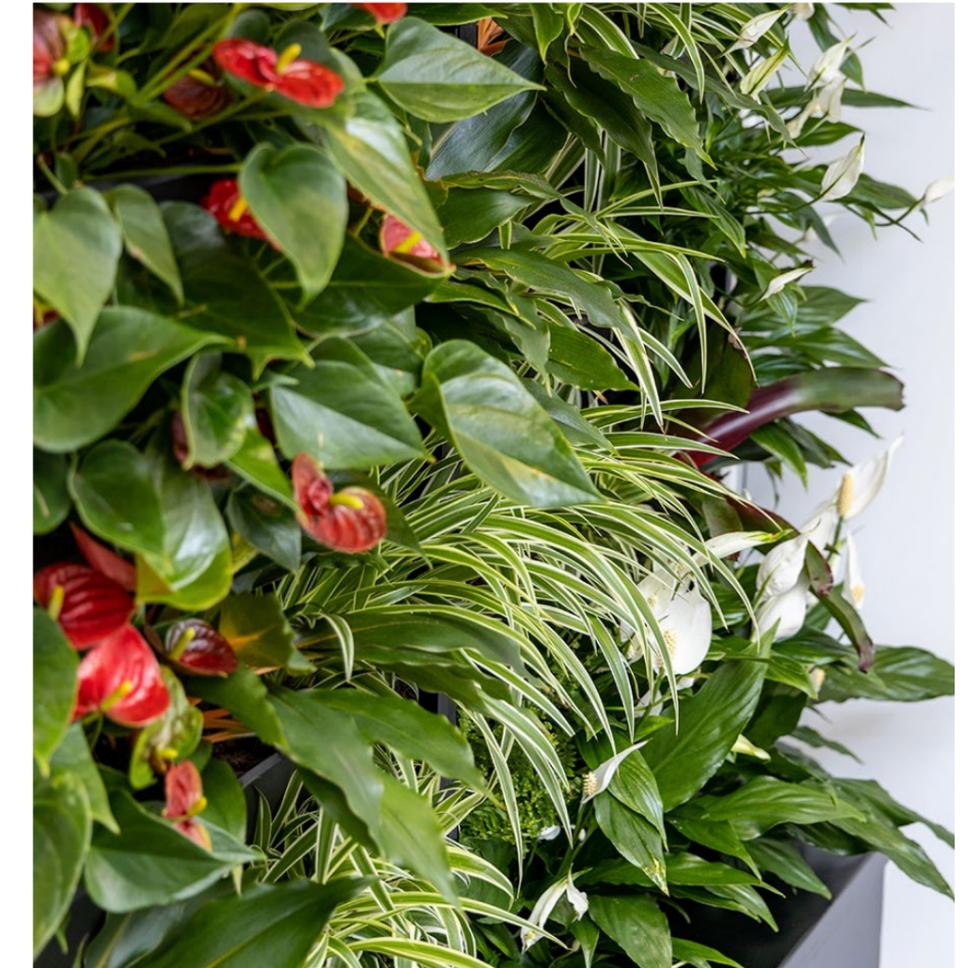

## CASE STUDY 8

# A Tropical Style Interior Wall.

An interior living wall allows you to choose from an array of interesting plants. With the use of Spathiphyllum (peace lilies), Anthurium, Neoregelia as well as various grasses and ferns, we've achieved a tropical, lush feel for this office living wall.

Two small pumps are housed in a concealed tank underneath the wall. One to feed the irrigation, and another to circulate the water through a UV light which prevents any bacterial contamination of the water. A low-maintenance, high-impact feature for any home or office.

*Guide Price: £3,000 - £3,500 + VAT*

*“The service was impeccable. They worked efficiently as a team and by lunchtime the living wall was fully planted and irrigated. They tested everything and tidied up thoroughly so the garden was ready to enjoy straight away”*

*“I specified that I wanted to incorporate some flowering plants to attract bees and wildlife and I also wanted some herbs for a vertical kitchen garden. Rosewood really understood my brief... The very first day it was installed we photographed bees on the flowers.”*

## Irrigation System Installation.

A Rosewood irrigation system is the crucial piece of the puzzle that ensures your living wall can continue to grow and thrive with very little maintenance from you. We've been designing and installing fully automated irrigation systems for countless gardens since 2011, so you can rest assured that your system will be reliable and effective – all you need is a garden tap. However, if you don't have access to an outdoor water supply our living walls can be easily watered by hand. A built-in indicator will remind you when the wall needs topping up with water.

OUR SYSTEMS

## Hassle-Free Vertical Gardening.

In the past, living walls have been notoriously difficult to maintain, but no more, thanks to PlantBox. This stackable, vertical garden system combined with our automated irrigation means a totally hassle-free living wall.

A modular system means you have complete flexibility with the height and width of your living wall. After spending many months researching the best products on the market, we found this to be by far the best quality system and we are excited to be able to bring this service to your garden.

*“My living wall was installed within a day, and the team were incredibly tidy. I would highly recommend a Rosewood Living Wall for anyone like me, who only has a small outside area.”*

*“I have a tiny garden and wanted a living wall, but the only free space was in a shady corner. Rosewood addresses challenges like this with great expertise. Calum and the team are extremely knowledgeable, not only about the technical construction side of living walls, but also about the right planting for a particular situation. Very impressed!”*

## HOW WE WORK

# What You Can Expect.

As a small, family-run company, it's important to us to maintain a warm and tight-knit team who are conscientious and devoted to customer satisfaction. You can always expect caring and courteous communications, an extremely high standard of work and a team who care enough to do the little things, like showing up on time and tidying up thoroughly before they go. We will take care of everything, leaving you to relax and enjoy your new living wall.

## Site Visit + Consultation.

*We will first arrange a site visit to scope out a suitable location and size for the living wall. We will also take the opportunity to talk to you and understand your visual style as well as what you would most like to get out of your living wall.*

## Design + Quotation.

*We then produce a bespoke planting design that considers your requirements and ideas as well as practical elements such as the location of the wall. Once we have an approved planting design we will be able to provide a final quotation.*

## Purchase of Plants.

*Once the design is confirmed we will purchase all the plants on your behalf from our supplier whom we have used for many years and trust as having an excellent selection of quality plants. You may be surprised at just how many plants will go into your living wall.*

## Installation + Irrigation.

*On installation day our friendly, conscientious and respectful team will construct and plant your living wall, bringing your design to life. Many installations take less than a day so your space could have this striking new feature in a matter of hours. Wherever possible, our living walls are fully irrigated with our reliable automated irrigation system. This will ensure your wall gets just the right amount of water so it can continue to grow and thrive for years to come.*

WHY CHOOSE ROSEWOOD?

## Family Owned. Family Run.

From the same family that have owned and run Rosewood Irrigation Services since 2011, you can trust our track record of high standards, attention to detail and care for our customers. A tight-knit and reliable team, we always go out of our way to do the little things and are devoted to leaving our customers delighted with our service. We do our best to lead by example and train our staff to reach new levels of skill. We're so proud of our people, we're confident that you won't find a more dedicated team across the board.

## Visit Us.

Our office on Hatfield Road in St Albans is a welcoming environment where you can have a demonstration of the system we use as well as seeing our own living wall. It also gives you the opportunity to meet us in person over a cup of coffee, so you can ask us any questions you have. We want to ensure you have full confidence that we are the kind of people you want to work with and that we can deliver everything we promise.

Please give us a call to arrange an appointment - we really look forward to meeting you.
